

## Region 3 Homeless Population Point in Time Survey January 28, 2009

The North Dakota Coalition for Homeless People (NDCHP) conducted a statewide point-in-time survey of homeless people on January 28, 2009. The survey collected information relating to demographics, education, employment, veteran status, common characteristics, and service utilization.

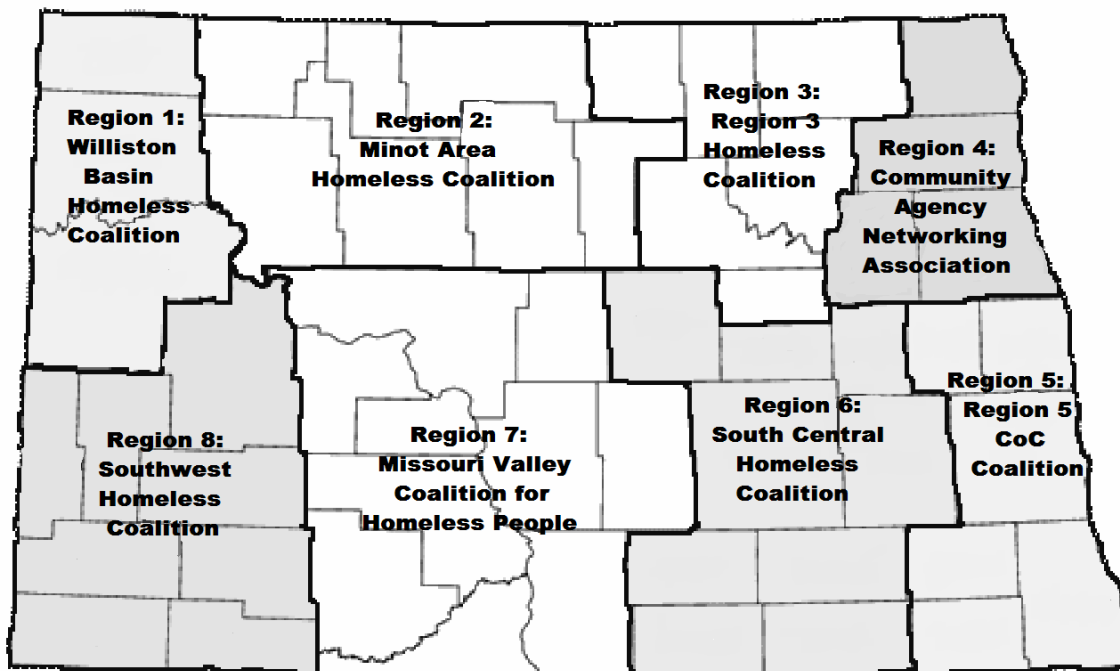

The following table shows the total count of homeless persons by region, age and status as “chronic” or “long term homeless”.

Region	Adults	Children <18	Total persons	Chronic <sup>1</sup>	Long Term Homeless <sup>2</sup>
1	15	0	15	0	2
2	35	16	52*	1	9
3	25	3	37*	0	5
4	137	52	189	8	26
5	291	61	352	56	114
6	43	3	46	0	22
7	195	81	276	5	46
8	15	4	20*	0	3
Total ND	756	220	987*	70	227

\* Information regarding age was not available for 11 homeless persons.

<sup>1</sup> *Chronic status* is determined using the HUD definition, which is an individual with a disabling condition who has been homeless for at least one year or, four or more times in the last three years, and is sleeping either in an emergency shelter or somewhere not fit for human habitation.

<sup>2</sup> *Long term homeless (LTH)* is the definition adopted by the ND Interagency Council on Homelessness, which is an individual or a family with a disabling condition who has been homeless continuously for at least one year or more than four times in the last three years. The ICH definition does not exclude people who are currently living “doubled up” with friends/family, people precariously housed in motels or those in transitional housing.

The 2005, 2006, 2007, 2008 and 2009 survey results for Region 3 and the state of North Dakota are shown below. The results are listed by question and broken-out by subpopulation.

**1a. Where was the survey taken? (2009)**

2009 Total		2009 Chronic		2009 LTH

\*Table note: A "median" is the mid-point of the dataset, which means exactly 50% of the respondents are above that number and 50% are below. The median does a better job of accounting for "outliers" in the data (i.e., one respondent that is much higher or lower than all the others can skew the results when you use an average).
